

CERAFLUX

An ISO 9001 Certified Company

**"The Only Indian Company Manufacturing
Wide Range of Metallurgical Products "**

**CERAFLUX- 56D
(Flux for metal recovery from dross)**

PRODUCT:-

CERAFLUX-56D is pink colour powder made from salts of chloride & fluorides recommended for metal recovery from dross.

PRODUCT FUNCTION:-

The dross removed after cleaning the molten melt still contain some quantity of aluminium trapped in it. The exothermic reaction of CERAFLUX-56D with dross enables the recovery of aluminium.

APPLICATION:-

CERAFLUX-56D is recommended for metal recovery from dross. Firstly, charge about 10% of dross in crucible and sprinkle CERAFLUX-56D evenly over the dross surface. Ensure liquid cover of CERAFLUX-56D over the dross surface. Subsequently charge about 50% of dross along with CERAFLUX-56D in three to four stages. Finally, charge remaining quantity of dross along with CERAFLUX-56D. Allow the mixture to stand for few minutes. Rabble the dross mixture with ms tool or rod to ensure removal of trapped molten aluminium metal from the dross by exothermic reaction of CERAFLUX-56D.

APPLICATION RATE:- 2 to 5% depending upon the nature of dross.

STANDARD PACKING:- 25, 50 kg HDPE bag.

SHELF LIFE:- 12 months from date of manufacturing in closed intact packing kept in cool and dry place.

PRECAUTION:- Flux is hygroscopic in nature so store in dry atmosphere bags or storage bins tightly after use.

NOTE:- Above information is true and accurate based on controlled laboratory testing. However user is responsible for determining suitability for application at their end. No guarantee is implied since the condition in actual use differs widely & beyond our control.
